

PLASTIC TECHNIQUES, INC.

WORKMAN'S PLATFORM

Provides an extra lift when working from the ground.

Stable ... Durable ... Lightweight

- Lightweight! At 28 lbs., it weighs **35% less** than comparable models..
- Platform will support up to 400 lbs.
- Non-skid surface helps prevent slips.
- Its four large legs provide stability and help prevent tipping.
- The platform should be cleaned regularly because dirt and other contaminants can create a conductive path on its surface.
- The Workman's Platform is constructed from a special blend of copolymer, which is weather resistant and impervious to hydraulic oils, pulling gels, and a broad range of chemicals.
- While it is molded from non-conductive material, PTI has not conducted any electrical testing and does not warranty for dielectric value on the Model# 815001 platform.
- *Model# 815003 platform has all the same features of Model# 815001, but is dielectrically tested prior to shipment.

Model# 815001

PTI MODEL #	DESCRIPTION	SHIPPING WEIGHT
815001	29" x 23" x 12" Platform	32 lbs
*815003	29" x 23" x 12" Platform, dielectrically tested	32 lbs
